

# LIVING EARTH PUKETUTU GOLD

Living Earth's Puketutu Gold is so named, because it's derived from our older piles of compost and various mixes that have been left to age gracefully. A heavy soil-like aged compost that has good nutrient levels and is proving a real find in the quest by landscapers to purchase a growing media that resembles topsoil with good nutrient qualities.

## PRODUCT SPECIFICATIONS

|                                       |             |
|---------------------------------------|-------------|
| Moisture                              | 30-60%      |
| pH Range                              | 5.0 – 8.0   |
| Electrical Conductivity (ms cm-1)*    | ≤ 3.5       |
| Bulk density (kg per m3)              | 800 to 1100 |
| *Analysed in a 1:1.5 water extraction |             |

## QUALITY STANDARD

We take great care to bring you premium product. Our products are created from recovered green waste and are compliant to The New Zealand Standard NZS 4454 for Composts, Soil Conditioners and Mulches. For more information about NZS 4454 visit:

- » <http://www.wasteminz.org.nz/wp-content/uploads/Compost-NZ-a-toolkit-for-NZ-4454-PDF-FINAL.pdf>

## HANDLING PROCEDURE

When handling larger volumes of Puketutu Gold ensure stockpiles are covered to give protection against weather conditions.

## INGREDIENTS

- » Aged Compost
- » Aged Media

COMPOST BASED

REVIVES SOIL

## FREIGHTING & APPLYING

A truck & trailer will carry approximately 28m3. Use as a nutrient rich topsoil in garden beds and all large scale landscaped areas. Compact lightly.

## RECOMMENDED USE

- » Excellent as a topsoil alternative
- » Ideal for establishing NZ native and exotic mass plantings and amenity horticulture beds
- » Ideal as a lawn soil for large scale lawn areas
